

Short Biography

Dr. Tino Sanchez completed his postdoctoral training at Loma Linda University School of Medicine in immunology, cancer biology and translational research. He received his Ph.D. at the University of Southern California School of Pharmacy in the field of HIV therapeutic design and discovery. His prolific research career has included more than 40 peer-reviewed articles. His article in *Molecular and Cellular Proteomics* titled "Immunoproteomic profiling in African American men with prostate cancer: evidence for an autoimmune response to glycolysis and plasminogen-associated proteins" was highly accessed for its first two months. Research interests include using the immune system to identify cancer therapeutic pathways, improving precision medicine, and repurposing HIV inhibitors for cancer.
